

UNIVERSAL BLANKING KIT

STANDARD FEATURES

The Universal Blanking Kit is an economical alternative to floor standing rack replacement panels for Day 1 missing cabinets. The UBK consists of aluminum extrusion mounted to the data center floor and the hot aisle side of the upper containment that has channels to receive 8mm twinwall polycarbonate panels. Between panels, we install vertical 3030 extrusion for support and rigidity. The UBK can be installed as a temporary solution or a permanent solution depending on your needs. The UBK comes as a 96" track and full sheet panels that are field modified to fit the application using simple hand tools.

- Quick Lead Times
